

Introducing

Borchi[®] RapidDry

Rapidly improves dry times when
used with common drier systems

Trim enamel application data
utilizing alkyd resins

Borchi® RapidDry

Drier Performance Booster

Borchi® RapidDry is designed to be used with current drier systems (cobalt, zirconium, calcium) to significantly improve dry time at an economical cost. This drier additive not only rapidly decreases dry time, but depending on the type of resin formulation it is used in, Borchi® RapidDry provides other performance enhancements such as improved adverse drying, washability, and non-yellowing.

Performance results in alkyd resin formulations

Faster dry times in standard & adverse conditions

Brighter whites - less yellowing

Better washability

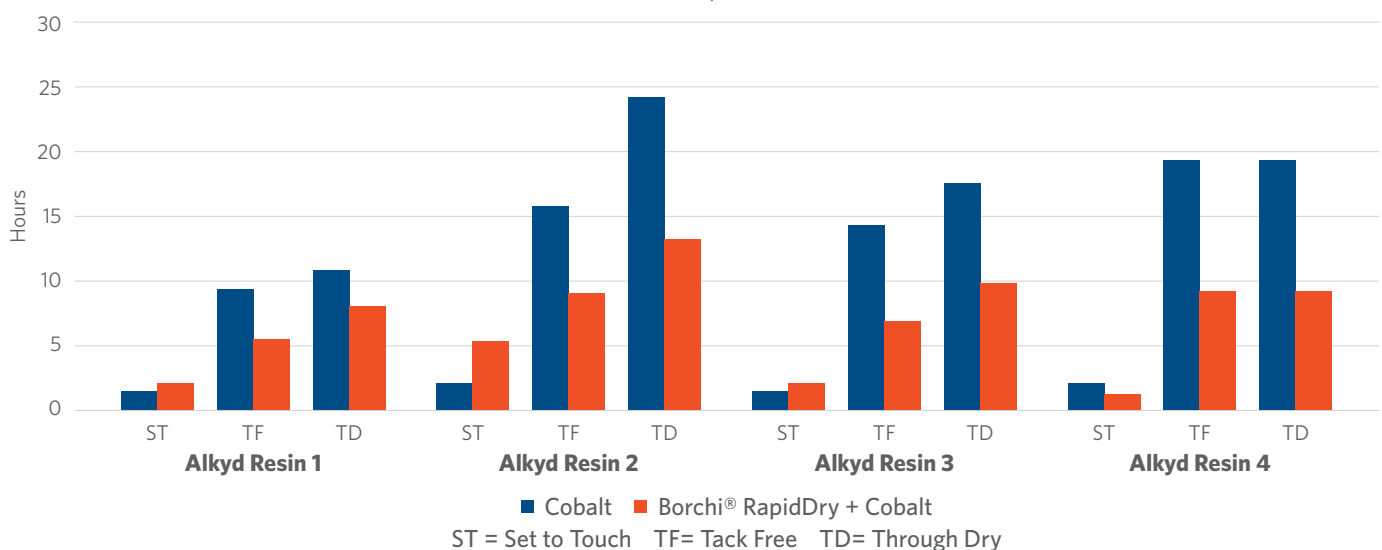

Economical

Significantly improved dry time when Borchi® RapidDry is used in standard drier systems

Dry Time @ 23°C 50% RH

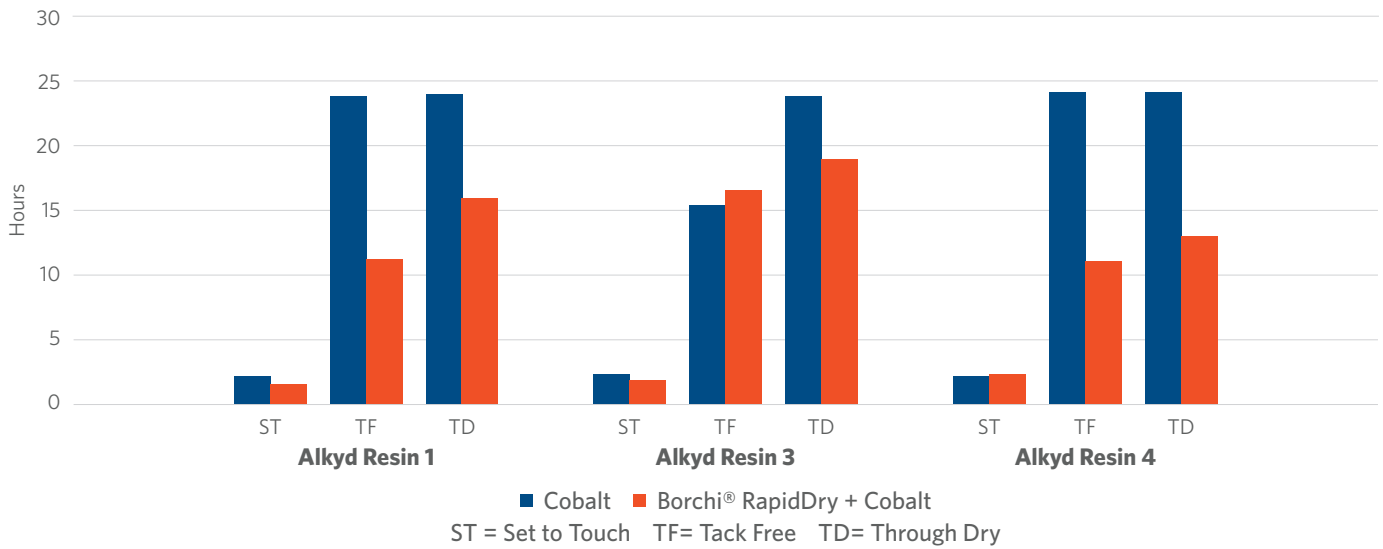

Conducted at 100 µm wet film thickness

Improved dry time in adverse conditions

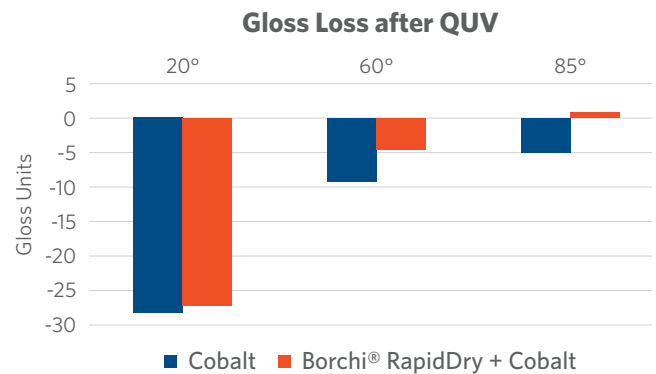

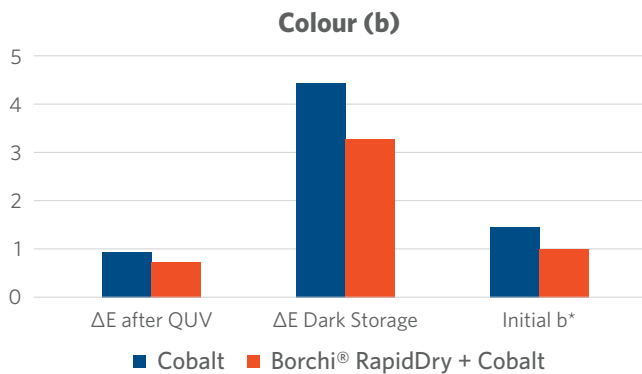

Adverse Dry Time @ 10°C 80% RH

Conducted at 100 µm wet film thickness

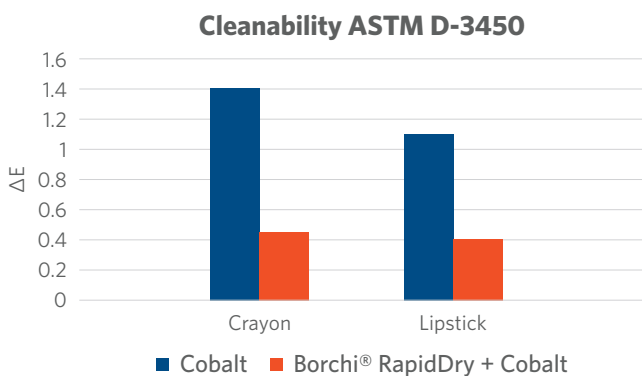

Borchi® RapidDry delivers less yellowing and better cleanability in certain alkyd resin formulations

Excellent ability to withstand outdoor exposure

Typical household stains are easily removed

Borchi® RapidDry
